## ***Associate Technical Consultant***

Thank you for your interest in employment opportunities with Noria Corporation. Please submit cover-letters and resumes for this position to [hr@noria.com](mailto:hr@noria.com). Noria Corporation offers competitive salaries and benefits packages including 401(k), medical, vision, dental, and life insurance benefits.

**Summary:** This is a full-time position whose primary responsibilities will be providing support to Lubrication Program Design project groups under the guidance of a Senior Technical Consultant. The Associate Technical Consultant will be trained in the business of lubrication excellence through Noria live and online training classes, on-the-job training, and numerous technical reference materials.

### **Essential Functions:**

- Serve as a part of Lubrication Process Design (LPD) team under the guidance of a Senior Technical Consultant.
- Provide basic awareness training to in-plant personnel as a part of the LPD process.
- Develop and hone knowledge and skills in writing and presenting articles and papers for Noria's magazines and conference.
- A willingness and availability to travel a minimum of 50% to support ongoing projects.
- Travel a minimum of 50% to support on-going projects.

### **Education/Background Requirements:**

- Associate's Degree in Mechanical Engineering, Engineering Technology, or related field.
- Significant experience with mechanical equipment.
- Experience with lubrication, oil analysis, Tribology and/or contamination control is a plus.
- ICML Machinery Lubrication Technician (MLT) Level I and II and Machinery Lubricant Analyst Level II preferred (or ability to pass upon within 3 months of hire).
